

Call for Papers Special Issue on "ISEBTT- 2nd World Congress on Electroporation 2017"

Aims

TECHNOLOGY is calling for papers for a Special Issue that will be derived from a selection of papers presented at the 2017 2nd World Congress on Electroporation, to be held at Norfolk (VA) from 24 - 28 September 2017.

The conference will attract a diverse international audience and focus on most aspects of electroporation science and engineering, particularly fundamental science, engineering science, biological, medical, food, biotechnology and environmental applications, tools development, industrial scale systems. Papers in both oral and poster presentation format can be submitted in any of the following topical areas of electroporation and pulsed electric fields:

Topics of Interest

Devices	Environmental Applications
Imaging	Biotechnology Applications
Process Development	Biorefinery
New Approaches to Study Electroporation	High Power Components & Circuit Development
Phenomena	Food Science and Engineering Applications
Medical applications	

Important Dates

Interested authors should submit their **abstracts by 15 October 2017** through the official website.

Please note that invited authors will need to submit **full-length papers** or **communications** to the journal following the conference by **December 31, 2017**. The papers submitted to the special issue will be subject to the normal peer review procedures for this journal and expected to be published in the first half of 2018.
